Advanced iOS

FINAL PROJECT REQUIREMENTS

Prepared by: Juan Uzcategui

June 2019

SUMMARY

Objective

Display a contact list of randomly generated user data that will then segue into a detail view with additional data.

Solution

Use the REST API service at https://randomuser.me/documentation#howto to generate **50** contacts. Use your last name as **SEED**.

Display those contacts in a custom table view cell.

Display additional information for each contact in a detail view screen.

Project Requirements

GENERAL REQUIREMENTS

- Project must compile.

- Data should be consistent throughout runtime.

- Application needs to have a name

- Application needs to have an icon

- Application must utilize AutoLayout on all the User Interface elements

- Application must begin with a **Splash Screen**

    - Must have an App Name **Title**

    - Must have a Student Name **Subtitle**

    - Must have a Login **Subtitle**

- Application must then load a **Table View**

    - Table View rows should have two alternating colors

    - Information on each cell should include:

        - Small circular image to the left of the cell

        - Full name: "first" plus "last" name **Title**

        - Email **Subtitle** right below it.

    - Application must then load a **Detail View**

- Detail view must include the following information:

  - Title

  - First

  - Last

  - Street

  - City

  - Email

  - Phone

  - Cell

  - Large Picture

PROJECT DUE DATE

Project must be delivered before **11:59 pm on Friday 12 of July 2019.**

PROJECT DELIVERY

Project should be uploaded to your personal GitHub. Send me an email with the link at jjuzcateguir@gmail.com

I will not accept compressed files of the project. Only through GitHub.
